

Teachers' Experiences of Teaching Science with Limited Laboratory Resources

Filesize: 8.09 MB

Reviews

It is straightforward in go through easier to recognize. I actually have study and that i am sure that i will going to study yet again again down the road. Once you begin to read the book, it is extremely difficult to leave it before concluding.

GRIN Verlag GmbH Okt 2014, 2014. Taschenbuch. Book Condition: Neu. 213x151x7 mm. This item is printed on demand - Print on Demand Neuware - Master's Thesis from the year 2013 in the subject Pedagogy - Miscellaneous Topics, grade: B+, , course: Master of Education, language: English, abstract: Laboratory resources play a vital role in the teaching-learning process of science subjects. However, in Tanzanian public secondary schools, there is inequality in the provision of these resources such that the community secondary schools have very few laboratory resources. Yet, these schools sit for the same national examination with better resources schools. This study focused on exploring teachers experiences of teaching science subjects with limited laboratory resources in community secondary schools in Lindi region in Tanzania. The study employed qualitative case study design. The research participants of the study were four science teachers from two community secondary schools. Data was collected through qualitative semi-structured interviews, classroom observation, focus group discussion and informal conversations. The study identified that there is a great deficiency in the availability of science laboratories resources. Whereas one school has a laboratory with limited resources, in the other school, uses movable laboratory to perform science experiments since the school has no laboratory. The findings of the study indicated that science teachers experience difficulties in teaching and learning science because of inadequate laboratory resources. This limits them to teach according to their belief, that for effective teaching and learning science, students should be involved in hands-on activities. The shortage of these resources forces teachers to conduct science experiments in order of priority; they organized experiments for those classes that were preparing for national examinations. 68 pp. Englisch.
