Book Condition: New. Publisher/Verlag: epubli | This PhD thesis provides novel solutions to major topics within the analysis of next-generation sequencing data, focusing on parallelization, scalability and reproducibility. | The analysis of next-generation sequencing (NGS) data is a major topic in bioinformatics: short reads obtained from DNA, the molecule encoding the genome of living organisms, are processed to provide insight into biological or medical questions. This thesis provides novel solutions to major topics within the analysis of NGS data, focusing on parallelization, scalability...
